GURPREET SINGH

Full Stack Developer · Laravel & PHP Specialist

Results-driven developer with **4+ years** specializing in the Laravel ecosystem. Expert in architecting RESTful APIs bridging complex backends with high-performance mobile (iOS/Android) and web applications. Leverages **AI-assisted engineering** (Cursor AI, GitHub Copilot) to accelerate the SDLC, while modernizing the frontend stack with **React & TypeScript** for scalable, production-ready solutions.

EDUCATION

Bachelor of Computer Applications (BCA)
Modern Group of Colleges · CGPA 7.5/10
Core: Data Structures, DBMS, Operating Systems, Computer Networks, Software Engineering, Web Technologies, OOP with C++/Java.
Minor Project: Digital Publication Platform in **Django**.
Major Project: Digital Publication Platform in **Flask**.

CERTIFICATIONS

Programming for Everybody (Python)
University of Michigan · Coursera

HTML Course Certificate
SoloLearn

TOOLS & ENVIRONMENTS

Editors / IDEs
VS Code (primary), Cursor, Sublime Text

AI Tools
Cursor AI, GitHub Copilot, ChatGPT

Dev & Ops
Git / GitHub · Postman · Figma · Linux / Ubuntu · Agile

TECHNICAL SKILLS

AI-Enhanced Engineering
Cursor AI, GitHub Copilot, ChatGPT — SDLC acceleration, boilerplate generation & rapid refactoring

Frontend Development
React, TypeScript, Inertia.js, ES6+, SCSS/SASS, Bootstrap 5

Backend Architecture
Laravel, PHP 8+, RESTful APIs, Middleware, Sanctum / Passport Auth

Data Management
MySQL & PostgreSQL, Query Optimization, DB Normalization, Firebase Real-time

WORK EXPERIENCE

Freelance Full Stack Developer
Nov 2025 – Present
Self-Employed · Mukerian

- Building a modern e-commerce platform (Laravel + React + TypeScript via Inertia.js) for a local SME, from DB schema to Linux deployment.
- Delivering custom REST APIs, admin panels, and Sanctum-authenticated endpoints tailored to specific business workflows.
- Using Cursor AI and GitHub Copilot to reduce boilerplate and accelerate feature delivery.

Software Engineer
Mar 2025 – Oct 2025
Mind2Web

- Built and maintained complex RESTful APIs for high-speed data communication across web & mobile platforms.
- Optimized MySQL and PostgreSQL queries, reducing response times and improving application scalability.
- Resolved critical production issues to maintain high uptime for live client systems.

Web Developer
Oct 2021 – Oct 2024
Dharmani Apps and Software

- Led frontend development for 10+ client projects — responsive, pixel-perfect UI using Bootstrap 5 & SCSS.
- Built Laravel API infrastructure for iOS/Android mobile apps, ensuring seamless data synchronization.
- Integrated Firebase for real-time features; managed cross-platform data architecture.

PHP Developer Intern
Nov 2020 – Aug 2021
Hilt Web Solutions Pvt. Ltd.

- Built dynamic PHP/MySQL websites; implemented responsive, cross-browser-compatible frontend designs.

PROJECT PORTFOLIO

RadioMate & AirBeats — Broadcasting
Lead Backend Developer
Architected the complete backend & API suite for two digital radio platforms. Built custom Laravel admin panels to manage live streams, show schedules, and listener song requests across web & mobile apps.
Stack: Laravel, PHP, MySQL, REST API

DriveZero — Environment
API & Systems Architect
Engineered a unified real-time data-sharing system for vehicle CO_2 emission tracking across web & mobile. Built logic for generating environmental impact reports via a shared MySQL database.
Stack: Laravel, MySQL, REST API, Mobile Sync

Musist — Social Media
API Developer
A social media platform centered on music & self expression. Built APIs handling user-generated "muses," music track combinations, imagery, and a global community feed with real-time interactions.
Stack: Laravel, PHP, MySQL, Firebase

Fuse Systems — E-Commerce
Performance Specialist & Full Stack
A full fledged e commerce platform with product management, cart, orders & payments. Refactored the Laravel codebase and optimized MySQL architecture to handle high traffic with improved reliability.
Stack: Laravel, MySQL, Bootstrap, SCSS

DigiBot — AI Assistant
Backend Developer
Developed RESTful APIs connecting the mobile interface to AI logic for task prioritization, health & wellness tracking, and intelligent automated scheduling.
Stack: Laravel, PHP, REST API, Mobile

Digital Publication Platform (Major) — Academic
Solo Developer · BCA Major Project
A full-stack Content Management System (CMS) built with Flask & Python. Features dynamic content routing, user authentication, and MySQL backend for managing data relationships and persistent storage.
Stack: Flask, Python, MySQL
